UNITED AIRLINES
HOLDINGS, INC.

FY2025 Full-Year Results & 2026 Outlook

Investor Presentation | January 20, 2026

INVESTMENT THESIS

United Airlines is the world's largest airline by ASMs, operating from seven fortress hubs with #1 market share in six of seven.

The 2022–2025 EPS plateau ($10.05–$10.62) masks a deliberate transformation: revenue grew 31% while the company absorbed $10B+ in pilot contract costs and $2B+ in flight attendant increases — the largest labor cost step-up in airline history. That cost absorption cycle is now largely complete.

2026 guidance of $12–14 EPS (+22% at midpoint) marks the first time UAL would materially exceed its 2019 peak of $12.05, signaling the multi-year fleet investment cycle is producing returns rather than absorbing costs. Premium revenue (+11% YoY), a loyalty

MULTI-YEAR FINANCIAL RECOVERY ARC

From COVID trough through 2025 actual and 2026 guidance — the EPS plateau explained

Metric	FY2021	FY2022	FY2023	FY2024	FY2025	FY2026E
Revenue ($B)	$24.6	$45.0	$53.7	$57.1	$59.1	—
Adj. EPS	neg.	$10.61	$10.05	$10.61	$10.62	$12–14
Net Income ($B)	($2.0)	$0.7	$2.6	$3.1	$3.4	—
Adj. Pre-Tax Margin	neg.	~6%	8.0%	8.1%	7.8%	~10%+
ASMs (B)	178.7	247.9	291.3	311.2	330.3	~349
Fleet (year-end)	—	~1,300	1,358	1,406	1,490	~1,610
Employees	~75K	~92K	103K	107K	113K	—

KEY CONTEXT

EPS flat at ~$10.60 for four years is not a value trap — it’s a deliberate cost absorption cycle. Revenue grew 31% since 2022 on 33% ASM growth. The pilot contract ($10B cumulative, 34–40% raises) and flight attendant deal (20–28% raises) created a multi-year earnings plateau now largely behind the company. The 2026 $12–14 guidance is the first time UAL expects to materially exceed the 2019 peak of $12.05 EPS, signaling the investment cycle is finally producing returns.

FY2025 QUARTERLY P&L

Seasonal cadence, Q4 comp challenge, and the guidance revision/outperformance narrative

Quarter	Total Rev	YoY	Pax Rev	Cargo	Other	Net Income	Adj. EPS	Pre-Tax Mgn	ASMs (B)
Q1 2025	$13.2B	+5.4%	$11.9B	$0.43B	$0.92B	$0.39B	$0.91	3.0%	75.2
Q2 2025	$15.2B	+1.7%	$13.8B	$0.43B	$0.97B	$0.97B	$3.87	11.0%	84.3
Q3 2025	$15.2B	+2.6%	$13.8B	$0.43B	$0.98B	$0.95B	$2.78	8.0%	87.4
Q4 2025	$15.4B	+4.8%	$13.9B	$0.49B	$0.98B	$1.02B	$3.10	8.5%	83.4
FY 2025	$59.1B	+3.5%	$53.4B	$1.78B	$3.85B	$3.40B	$10.62	7.8%	330.3

Q4 COMP CHALLENGE

Q4 2025 vs Q4 2024: revenue +4.8% but EPS –4.9% ($3.10 vs $3.26) and margin –120 bps (8.5% vs 9.7%). Capacity grew faster than unit revenue recovered; holiday demand that supercharged Q4 2024 had partially normalized. This is a comps problem, not structural deterioration.

GUIDANCE TRACK RECORD

Initial 2025 guide: $11.50–$13.50. Mid-year cut (domestic PRASM softness + macro): $9.00–$11.00. Actual: $10.62 — at/near top of revised range, above consensus. This conservative re-guidance + outperformance pattern has been consistent since 2022. The $12–14 range for 2026 was issued in a similar cautious window.

Note: Q2 GAAP vs. adjusted gap was the largest ($447M in special charges, primarily fleet write-offs for early retirements). Full-year GAAP EPS of $10.20 vs. $10.62 adjusted.

UNIT ECONOMICS

TRASM decline was a 2025 industry phenomenon, not structural demand deterioration

ANNUAL TRENDS

Year	TRASM	PRASM	Yield	CASM	CASM-ex	Fuel/Gal	Load Factor
FY2023	18.44¢	—	20.07¢	16.99¢	12.03¢	$3.01	83.9%
FY2024	18.34¢	16.66¢	20.05¢	16.70¢	12.58¢	$2.65	83.1%
FY2025	17.88¢	16.18¢	19.67¢	16.46¢	12.64¢	$2.44	82.2%

QUARTERLY FY2025

Qtr	TRASM	PRASM	CASM-ex	Fuel/Gal	LF
Q1	17.58¢	15.78¢	13.17¢	$2.53	79.2%
Q2	18.06¢	16.40¢	12.36¢	$2.34	83.1%
Q3	17.42¢	15.80¢	12.15¢	$2.43	84.4%
Q4	18.47¢	16.71¢	12.94¢	$2.49	81.9%

TRASM –2.5% YoY

Industry overcapacity, not demand weakness. Passengers hit record 181M. UAL responded by cutting 4 pts of domestic capacity mid-year and retiring 21 aircraft ahead of plan.

CASM-ex +0.5%

Fuel saved ~$360M (price/gal: $2.65→$2.44). Labor consumed +$969M. Net: costs grew slightly faster than revenue. Labor headwinds are known and peaking; fuel efficiency compounds with new aircraft.

2026 THESIS

TRASM inflects up as industry capacity normalizes. CASM-ex stabilizes as deliveries bring efficiency. The gap between revenue and cost lines widens into margin expansion. That is the entire 2026 thesis.

FUEL SENSITIVITY: UAL carries no financial fuel hedges. Every $0.10/gal move = ~$466M annual P&L impact (4.663B gal consumed). A return to 2023's $3.01/gal = ~$2.7B headwind vs. ~$4.6B adj. pre-tax income.

OPERATING EXPENSE COMPOSITION

OpEx +4.6% vs. revenue +3.5% — the composition tells different stories about durability

Line Item	FY2025	FY2024	YoY Δ	YoY %	% of Total
Salaries & related	$17.65B	$16.68B	+$969M	+5.8%	32.5%
Aircraft fuel	$11.40B	$11.76B	–$360M	–3.1%	21.0%
Landing fees & rent	$3.85B	$3.44B	+$412M	+12.0%	7.1%
Maintenance	$3.29B	$3.06B	+$231M	+7.5%	6.1%
Depreciation	$2.94B	$2.93B	+$11M	+0.4%	5.4%
Regional capacity	$2.69B	$2.52B	+$177M	+7.0%	5.0%
Distribution	$2.11B	$2.23B	–$122M	–5.5%	3.9%
Other	$9.92B	$9.05B	+$866M	+9.6%	18.2%
Total OpEx	$54.36B	$51.97B	+$2.39B	+4.6%	100%

LABOR: KNOWN & BOUNDED

+$2.9B in two years. Pilot contract ($10B value, 34–40% raises) front-loaded — steps down by 2026–27. FA deal removes multi-year overhang. Gauge-up: labor cost per seat served rising less than cost per employee.

LANDING FEES: GOOD COST

+12% is almost entirely self-inflicted: $2.7B EWR Terminal A, ORD T2 renovation, DEN gate expansion. Correlation between this line and NPS improvement is not coincidental. Deferred premium spending in the OpEx line.

DISTRIBUTION: HIDDEN TAILWIND

–5.5% as booking mix shifts to direct channels. App handles 85% of check-ins. Direct bookings capture more ancillary revenue + better loyalty data. Engagement metrics accelerating, not plateauing.

REVENUE BY REGION

A two-speed airline: domestic fare softness vs. international structural strength

ANNUAL PASSENGER REVENUE

Region	FY2023	FY2024	FY2025	3-Yr CAGR
Domestic	$31.9B	$28.5B	~$31.6B	–0.4%
Atlantic — Europe	$8.1B	$8.1B	~$10.1B	+11.9%
Atlantic — MEIA	$1.0B	$1.1B	~$1.3B	+14.0%
Pacific	$4.4B	$5.2B	~$6.9B	+24.5%
Latin America	$3.7B	$4.8B	~$5.5B	+22.8%

Q4 2025 DETAIL

Region	Q4 Rev	Q4 YoY	Q4 PRASM Δ	Q4 ASM Δ
Domestic	$8,301M	+2.0%	–1.9%	+4.0%
Europe	$2,274M	+8.7%	+1.3%	+7.3%
MEIA	$410M	+58.7%	+1.7%	+56.0%
Pacific	$1,626M	+10.1%	+4.2%	+5.7%
Latin Amer.	$1,317M	+0.5%	–7.6%	+8.7%

MEIA: EMERGING GROWTH VECTOR

+58.7% Q4 revenue with +56% capacity deployment — all new route ramps (EWR–Dubai, EWR–Delhi, SFO–Bangalore). India is a structural opportunity: world's most populous country with rapidly growing outbound travel. UAL is the most aggressive U.S. airline in India/Gulf. A321XLR in 2026 gives more tools to expand beyond gateway hubs.

PACIFIC: +24.5% 3-Yr CAGR. "Only U.S. carrier" monopoly routes to Bangkok, Adelaide, Ho Chi Minh City carry premium business passengers with no alternative.

DOMESTIC: THE VARIABLE THAT MATTERS

PRASM negative in every quarter of 2025 (worst: –7.0% in Q2). Industry added seats faster than domestic fares could absorb. But domestic is 54%+ of pax revenue — even modest PRASM improvement on that base compounds quickly into earnings leverage.

LATIN AMERICA: Genuine softness (PRASM –13.5% Q3, –7.6% Q4). Brazilian carrier competition + LatAm macro headwinds. Only ~10% of pax revenue — manageable drag, not a thesis-breaker.

REVENUE QUALITY — PREMIUM & LOYALTY

The quality-of-earnings story that gets the least credit in bear-case analyses

+11%	+9%	+12%	27.4M	130M+
Premium Cabin FY2025 YoY	MileagePlus FY2025 YoY	Chase Card Spend FY2025 YoY	Premium Seats Flown FY2025	MileagePlus Members

PREMIUM MIX SHIFT

Premium +11% vs. Basic Economy +5% — deliberate mix shift toward higher-yield passengers less likely to trade down in a downturn.

Signature Interior rollout: 119 aircraft (68% of NB fleet) with new seatback screens + larger bins. NPS +10 pts on equipped aircraft.

Premium seats per N. American departure +40% since 2021 via gauge-up: retiring 50-seat RJs, replacing with mainline aircraft carrying more premium rows.

LOYALTY & MILEAGEPLUS

1M+ new Chase cards/yr for 3rd consecutive year. Card spend +12% YoY on large base — a compounding flywheel.

2020 MileagePlus valuation: ~$22B (used as collateral for $6.8B COVID financing, now fully repaid). Program has grown since. UAL market cap: ~$28B. Market ascribes minimal standalone value above embedded.

April 2026: New Chase card benefits: 2× miles for cardholders, 10–15% discount on award redemptions.

CEO target: 2× MileagePlus profits by 2030.

FLEET MODERNIZATION & UNITED NEXT

630+ new aircraft by 2034 — the largest fleet transformation in UAL history

1,490
Fleet Dec 2025

~1,610
Fleet Dec 2026E

~120
2026 Deliveries
(Largest since 1988)

174
Avg Seats/Departure
(vs. 151 in 2019)

ORDER BOOK THROUGH 2034

Aircraft	Role	Remaining / Target
Boeing 787-9 Elevated	Long-haul premium intl	47 next wave; 30+ by end 2027
Boeing 737 MAX (8/9/10)	Domestic / short-haul NB	200+ remaining
Airbus A321neo (standard)	General domestic	18+ remaining
Airbus A321neo Coastliner	Domestic transcon lie-flat	50 ordered; 40 by Apr 2028
Airbus A321XLR	New transatlantic + S. Am.	50 ordered; 25+ by 2028
CRJ450 (SkyWest)	Premium regional upgrade	70 total; 50 by 2028

BOEING DELIVERY RISK

FAA cap of 38 MAX/month post-door plug incident. MAX 10 certification pending (200 aircraft). Each month of delay = ~$30–40M deferred efficiency benefits. A321neo/XLR orders explicitly hedge Boeing timing uncertainty.

GAUGE-UP ECONOMICS

Each new 737 MAX / A321neo burns ~20% less fuel per seat and requires fewer crew per seat served. 50-seat RJs replaced by 150+ seat mainline — a labor productivity strategy disguised as fleet strategy.

CAPEX: $5.9B in 2025 | <$8.0B guided 2026 | $7–9B/yr multi-year guidance as delivery ramp continues through 2027

NEW PRODUCT ARCHITECTURE: 2026–2028

Four new aircraft products that redefine UAL's competitive position

787-9 ELEVATED

Inaugural: SFO–Singapore, Apr 22, 2026

222 seats / 44.6% premium — highest among U.S. widebodies

Polaris Studio: 8 suites, 25% larger than standard Polaris, 27" 4K OLED (largest on any U.S. carrier), privacy door, double-bed center config

Polaris: 56 lie-flat | PPL: 35 | E+: 39 | Econ: 84
All cabins: 4K OLED, Bluetooth, wireless charging

Target: 30+ aircraft by end 2027

A321neo COASTLINER

Launch summer 2026: SFO/LAX ↔ EWR/JFK

161 seats / First lie-flat on any U.S. domestic narrowbody

Polaris: 20 (1-1 lie-flat) — directly targets Delta One and JetBlue Mint on transcon routes where UAL currently has no competitive answer

Premium Plus: 12 (2-2) — first PPL on domestic NB
Economy: 129 with rear snack bar

50 ordered; 40 by April 2028

A321XLR

Launch summer 2026: new European & S. American routes

~150 seats / 4,700 nm range unlocks entirely new markets

Polaris: 20 all-aisle-access lie-flat with privacy door
PPL: 12 | Economy: ~118

Range enables direct EWR to Bari, Split, Glasgow, Santiago de Compostela, and deeper S. American cities — routes neither 757-200 nor standard A321 can serve. Not incremental — new addressable market.

50 ordered; 25+ by 2028

CRJ450 REGIONAL PREMIUM

Launch fall 2026: DEN + ORD hubs (SkyWest)

41 seats / Credible premium product on regional routes

United First: 7 seats, 37" pitch, overhead luggage closet (industry first on regional). Economy Plus: 16. Economy: 18.

Free Starlink Wi-Fi for MileagePlus members.

Converts regional from "middle-seat-blocked + snack box" to real premium. Critical for business travelers connecting through DEN/ORD.

70 fleet; 50 by 2028

STARLINK + KINECTIVE MEDIA

Connectivity as infrastructure for advertising and loyalty data — a nascent high-margin revenue stream

STARLINK ROLLOUT

- May 2025: First E175 regional with Starlink
- Oct 15, 2025: First mainline commercial flight (EWR)
- Feb 2026: 300+ mainline aircraft equipped
- End 2026: 800+ total aircraft (~25%+ of departures)
- End 2027: Full fleet completion
- Install pace: 50+ aircraft per month
- Free for all MileagePlus members

KINECTIVE MEDIA NETWORK

Three assets no other airline possesses simultaneously:

227,000+ seatback screens across a captive audience

108M unique annual flyers with known demographics

130M MileagePlus members with deep first-party transaction data — miles, redemptions, card spend, hotel/car bookings

Better audience profile than most digital ad platforms — behavioral + purchase-intent data, not just demographics.

CFO: Kinective "will really start to accelerate in '26 and beyond." Media margins dramatically exceed seat revenue margins. The market currently values this business at approximately zero.

NPS IMPACT: Signature Interior aircraft score +10 NPS pts vs. planes they replace. For a 40×/yr business traveler, that translates to retention and card spend.

OPERATIONAL PERFORMANCE

Record passengers, record on-time, record NPS — and the demand signals that matter most for 2026

181.1M	#2	303	1M+	85%
Passengers Company Record	D:14 On-Time Industry Rank	Daily Widebody Departures (Record)	ConnectionSaver Rescues (+42% YoY)	Digital Check-In Rate (Q1 Record)

FORWARD-LOOKING DEMAND SIGNALS

Week ending Jan 4, 2026: Highest flown revenue week in UAL history.

Week ending Jan 11, 2026: Simultaneously the highest ticketing week AND the highest business sales week ever recorded.

Ticketing data is forward-looking — it reflects purchases for future travel. Record business bookings entering 2026 is the single strongest real-time indicator that 2025's domestic PRASM softness was temporary, not structural. Business travel leads leisure in recovery cycles.

COMPLETION

Best system completion factor in company history. United Express achieved 134 days with zero cancellations.

NPS

Company-record NPS in Q4 2025. November 2025 = highest-ever monthly NPS. Signature Interior: +10 pts vs. old interiors.

NETWORK

13 new international destinations in 2025 (Nuuk, Ulaanbaatar, Faro, Palermo, Bangkok, Adelaide...) + 29 domestic/Canadian routes.

BALANCE SHEET & DELEVERAGING

MileagePlus bond payoff completed — investment-grade path increasingly visible

Metric	Dec 2023	Dec 2024	Mar 2025	Jun 2025	Sep 2025	Dec 2025	2026 Target
Total Liquidity ($B)	$16.1	$17.4	$18.3	$18.6	$16.3	$15.2	—
Total Debt + Leases ($B)	$29.3	$28.7	$27.7	$27.1	$25.4	$25.0	—
Net Leverage	2.9×	2.4×	2.0×	2.0×	2.1×	2.2×	<2.0×
S&P Rating	BB	BB+	BB+	BB+	BB+	BB+	IG
Interest Expense	—	$1.629	—	—	—	$1.373	<$1.2E

MILEAGEPLUS BOND PAYOFF

Q3 2025: Prepaid remaining $1.5B of MileagePlus secured bonds, fully retiring $6.8B in MileagePlus-backed COVID financing by July 2025. Frees the MileagePlus asset, eliminates collateral restrictions, signals management confidence. Interest expense –15.7% YoY ($1.629B → $1.373B) — flows directly to EPS.

INVESTMENT-GRADE PATH

At ~$3–4B/yr deleveraging, UAL reaches <2.0× by year-end 2026. S&P IG criteria for airlines: 2.0–2.5× with earnings stability. Three consequences: (1) Lower aircraft financing cost (–50–75 bps on $25B = $125–190M/yr); (2) IG mandates open larger investor universe; (3) Multiple re-rating from “COVID bankruptcy risk” to “investment-quality enterprise.” Delta already carries BBB–.

Adjusted net debt: $18.8B (Q1 2025) vs. $22.5B (Q1 2024). Deleveraging pace: ~$3–4B per year. The question is not whether IG happens — but whether to own the stock before or after the rating action.

CASH FLOW & CAPITAL ALLOCATION

CapEx bulge through 2027 delivery ramp, then normalization to $3–4B sustained FCF

Metric	FY2023	FY2024	FY2025	FY2026E
Operating Cash Flow ($B)	$6.9	$9.4	$8.4	—
Net CapEx ($B)	$7.9	$5.6	$5.9	<$8.0
Free Cash Flow ($B)	($1.0)	$3.4	$2.7	~$2.7
Multi-Yr CapEx	—	—	—	$7–9B/yr

SHARE REPURCHASES

Year / Period	Amount	Note
FY2024	$81M	Capital preservation
FY2025	$640M	Breakout year
Q1 2025	$451M	Concentrated
Q3–Q4 2025	$48M	Slowed; CapEx accel.
		Approved Oct

CAPITAL ALLOCATION PRIORITY

1. Fleet CapEx

Non-negotiable given firm orders

2. Debt Reduction

$3.7B total debt reduction in FY2025

3. Share Buybacks

$640M in 2025; likely higher in 2026

4. No Dividend

None planned near-term

POST-2027 FCF NORMALIZATION

FCF step-down ($3.4B → $2.7B) despite higher net income is a CapEx story. ~120 aircraft in 2026 at $50–70M each creates a bulge persisting through 2027.

Once backlog thins (~2028), CapEx normalizes to $5–6B maintenance-plus-growth vs. $8–9B operating CF = sustained $3–4B FCF.

FCF/share: $3.5B on ~320M shares (2027–28E) ≈ ~$11/share. At 5–8× airline sector FCF multiples, that implies significant equity value vs. current price.

Q1 2025 TTM peak: Operating CF $10.3B, Free CF $5.0B — temporarily boosted by advance ticket sales and delivery timing, but illustrates underlying cash generation capacity.

SUSTAINABILITY & CLIMATE

Honest framing: absolute emissions rise with growth; intensity falls with fleet efficiency

GHG EMISSIONS

Category	FY2021	FY2022	FY2023	FY2024	Δ2023–24
Scope 1 (M MT CO2e)	21.4	30.4	36.6	38.5	+5.3%
Scope 2 Market (K MT)	161	149	144	134	–6.6%
Scope 3 (M MT)	12.2	13.3	12.7	13.6	+7.2%

SAF PROGRESS

Year	SAF Gal (M)	GHG Reduction	CO2e Avoided (MT)
2021	0.6	83.4%	5,953
2022	2.9	88.2%	29,362
2023	7.3	82.4%	68,370
2024	13.6	83.5%	126,174

1.0

COMMITMENTS

Net zero GHG by 2050

First global airline to commit without traditional offsets

50% emissions intensity reduction by 2035

vs. 2019 baseline, SBTi-validated

CDP Score: A- | $200M+ UAL SAF Fund

Eco-Skies Alliance: 50+ corporate partners co-investing in SAF — socializes supply development cost across corporate customers

HONEST INVESTOR FRAMING

SAF at 13.6M gal vs. 4.2B+ total fuel = <0.35%. Doubling annually since 2021, but the gap between current penetration and 2050 target is enormous.

Absolute emissions will rise with capacity growth for the foreseeable future. 2035 target is intensity-based (per RTK/ASM) — achievable with newer aircraft. 2050 net zero depends on technologies that don’t exist at commercial scale today (green hydrogen, next-gen SAF, carbon removal).

UAL Ventures ($200M+): Twelve, ZeroAvia, Dimensional Energy, Cemvita, Svante — shaping the supply curve, not just procurement. Genuine strategic investment, not greenwashing.

2026 GUIDANCE & RISK MATRIX

$12–14	$13.00	~10%+	~$2.7B	<$8.0B	<2.0×
Adj. EPS Guidance	EPS Midpoint	Pre-Tax Margin	Free Cash Flow	Net CapEx	Year-End Leverage

KEY RISKS TO THE 2026 THESIS

Risk	Magnitude	Mitigant
GDP recession	–1.5–2% rev per 1% GDP	Premium/intl mix; loyalty is contract-based
Fuel spike	$0.10/gal = ~$466M; unhedged	New aircraft burn ~20% less/seat
Boeing MAX delays	~$30–40M/mo deferred efficiency	A321neo/XLR hedge; existing fleet performing
Domestic PRASM stays negative	Margin expansion stalls	Mid-year capacity cuts showed discipline
MAX 10 certification slip	200 aircraft in tranche waiting	Can defer CapEx; no hard date committed
MileagePlus re-contract (2029)	Chase deal terms uncertain	Delta/AmEx parity gives pricing leverage

THE BULL CASE: If TRASM inflects positive in Q1–Q2 2026 as industry capacity tightens, UAL tracks toward $14 EPS or higher. At the current multiple, that represents significant equity upside. The base case of $13 midpoint is already a ~22% EPS growth year — which in a normal market commands a premium multiple for an airline finally breaking through into double-digit pre-tax margins.

APPENDIX A — FINANCIAL DETAIL

Three-year income statement, hub network, workforce, and fleet history

HUB NETWORK (2026 SCHEDULE)

Hub	Code	2026 Dep.	2026 Seats	Position
Chicago O'Hare	ORD	250,306	28.6M	#1 (31 consec. qtrs)
Denver	DEN	194,200	—	#1 (11 consec. qtrs)
Houston Bush	IAH	176,734	22.0M	#1
Newark	EWR	141,087	20.8M	#1 NYC intl gateway
San Francisco	SFO	104,442	—	#1
Washington Dulles	IAD	95,037	11.8M	#1
Los Angeles	LAX	49,717	8.1M	#2
System Total	—	1,896,990	242.6M	Largest U.S. by ASMs

FLEET TRAJECTORY

Period	Fleet Count
Dec 2023	1,358
Dec 2024	1,406
Q1 2025	1,442
Q2 2025	1,473
Q3 2025	1,486
Dec 2025	1,490
Dec 2026E	~1,610

MACRO: Every –1% GDP ≈ –1.5–2% revenue. Intl revenue (>35% pax) provides structural diversification. Premium/loyalty (~60%+ of rev) provides pricing buffer.

WORKFORCE & LABOR CONTRACTS

Date	Employees	Salaries ($B)
Dec 2023	103,300	$14.8
Dec 2024	107,300	$16.7
Dec 2025	113,200	$17.6

Union	Group	Status
ALPA	Pilots	Ratified mid-2023; ~$10B; through ~2027
AFA	Flight Attendants	TA early 2025; 20–28% raise
IBT	Mechanics	Ratified 2024; substantial
—	Ground Workers	Updated 2024–25; inflation-adj.

LONG-TERM UNITED NEXT TARGETS
